## Foreword

### Structure of the Report

This report is broadly organised by geographical region.

The first chapter is a **World Summary** which gives an overview of the global lithium situation and global forecasts for the next ten years.

The report is then broken down into 11 main geographical regions in the following order:

- [Africa](#)
- [Argentina](#)
- [Australia](#)
- [Bolivia](#)
- [Brazil](#)
- [Canada](#)
- [Chile](#)
- [China](#)
- [Europe](#)
- [Russia](#)
- [USA](#)

Within each geographical region the lithium projects are presented in alphabetical order by name, except within [Africa](#) and [Europe](#) where they are presented in country alphabetical order and then by project name within each country (where applicable).

[Russia](#) and [China](#) consist of a single dedicated chapter each covering all the mines and projects in those countries.

3 additional country chapters are interspersed separately within the 11 regions listed above: [Afghanistan](#), [Mexico](#), [Peru](#) and at the end of the report there is a final chapter on the potential impact of [Sodium Ion Technology](#).
